

Project: The Wave
Year: 2008-2009
City: Muscat, Oman
Client: Oman's Waterfront Investment (SAOG)

Contractor: Al Turki Enterprises
Consultant: W. S. Atkins
Products: ITT Lowara FHE and CA Booster Sets

Introduction

The Wave, Muscat is to be a mesmerizing new pearl on the Sultanate of Oman's shoreline. The Wave, Muscat combines more than 4,000 beautiful properties, a 300-yacht berth marina, Greg Norman signature golf course, three premier hotels and new retail, leisure and dining opportunities at a bewitching seafront address. This is the first integrated resort and residential development to be undertaken in the greater Muscat region.

Products & Application

Ahmed Ramadhan Juma has supplied and installed FHE 11KW and CA 1.5KW ITT Lowara booster sets comprising of 1 duty and 1 standby pump complete with control panel to work in accordance with the program on the irrigation controller. These sets are being used to operate the sprinklers used for the landscaping.
